A FULL MEETING AT THE ACADEMY OF MEDICINE.

THE CAMPAIGN FOR CLEANLINESS WILL BE AS FIERCE AS THE POLITICAL WAR WAGED BY OTHER CLUBS.

The Woman's Health Protective Association be gan another season's work yesterday morning at the Academy of Medicine with a long session, which was devoted mainly to routine business. No new plans were broached, and the time was taken up in hearing the reports of committees appointed

The Committee on Street Cleaning caused some amusement by reporting that the streets were in good condition. The chairman admitted that between Mr. Collis and the traction company we were in a bad way, but was convinced that it could not be helped. Mr. Collis has been communicated with regarding the matter, and has assured the association that when the work is done they will be satisfied that the results were worth the present discomforts. Complaints made to the Board of Health regarding nuisances incidental to the upheaval have been promptly attended to, and one was acted upon within two hours.

The president, Mrs. Ralph Trautman, reported that screens had been placed in the windows of the almshouses on Blackwell's Island; that she had the promise of the Park Commissioner and the Mayor that there should be a park on the dock at the foot of Forty-ninth-st., on the East River; and that the steps going down to the water at Fifty-second-st. to the Blackwell's Island boat would be repaired at once. All this is the direct result of the association's efforts.

The committee having the expectoration question in charge reported that the condition of the was much better than formerly. There was some talk of trying to stop expectoration in the streets

was much better than formerly. There was some talk of trying to stop expectoration in the streets as well as in the cars, but the consensus of opinion seemed to be that a little more education of the public would be necessary before anything further could be attempted in that line.

Apropos of this subject, the women had a good many amusing stories to tell. Mrs. Margaret Ravenhill said that in Chleago she saw a man go to the door of the car to expectorate, explaining his action at the same time by saying that the women was insolent, and to going one day into a cable-car that was all clean but the piatform. She called the conductor's attention to this circumstance, and the conductor's attention to this circumstance, and the many was insolent, and Mrs. Trautman reported him, apparently with good results, for when she happarently with good results, for when she happarently good of the same time by the good results and the conductor remembered her, and said, as soon as he saw her; "It is all clean now."

"Although this is a broad and general subject, I shall confine myself chiefly to-day to the relation of art to American commerce and American manufactures, for that I consider is something which con-

For sleigh-riding and country driving there is no more comfortable garment than the long Canadian "wolfskin" ulster, which comes in gray and black. QUIGG HAD A HARD ROW TO HOE.

THE WOMAN'S REPUBLICAN LEAGUE OF BROOKLYN APPARENTLY BE-LIEVES IN SETH LOW.

Lemuel E. Quigg was the attraction offered by the Woman's Republican League at their meeting in the Johnston Bulding, Brooklyn, yesterday. For nearly an hour Mr. Quigg labored to impress upon the women present the worthiness of General Tracy and the extreme unworthiness of Seth Low for the office of Mayor of New-York. Probably Mr. Quigg never had a more unpleasant hour in his life. No assembly of politicians was ever more free in expressions of opinion and more unmindful of the feel-ings of the speaker than were some of the women whom Mr. Quigg addressed. They believed in Seth Low and distrusted the machine. This fact they made painfully evident to Mr. Quigg, who several times seemed about to lose his usual abundant supply of self-assurance.

The meeting was called to order by the president, Mrs. Kate M. Bostwick. After minor business and Trimmed with four rows of smoked fox and lined with quilted silk.

The Tammany machine, of course, was a most baieful thing, but the Republican machine was the personification of beneficence. For the Citizens Union and its candidate Mr. Quigg had only contempt, "Seth Low," he said among other things, "is a young man who inherited a large fortune, whom it hasn't spoiled—wholly. He is president of a college free of debt when he took hold, now it is weighed down with a debt of \$3,000,000."

This was more than the women could stand. "How about Seth Low as Mayor of Brooklyn?" said one. "Yes, yes!" echoed a dozen more. Mr. Quigg looked puzzled, "No, ladies," he began, "nothing can be said against the good man except that he wants to be Mayor of Greater New-York through the destruction of the Republican party." ceeded to explain the beauties of a political mahe material between the rows, this shoulder he deep yoke.

This declaration was greeted with a storm of applause.

Mr. Quigg smiled as he said that he scarcely thought Mr. Platt could be destroyed, as his hold on the State machine was too firm.

After another eulogy of Mr. Platt, in which he gave to him the entire credit for the gold plank in the last Kepublican platform, he made the proposition that General Tracy was ready at any time to withdraw with Mr. Low in favor of either Cornelius N. Bliss or Frederick A. Schroeder.

Then Mr. Quigg made a touching appeal for union. "I agree with everybody that the sure way to win is union. You should agree with me that if Low cannot win and Tracy cannot win, neither should put his personality between the people and the defeat of Tammany. Tracy is willing to retire at any time. But Low, he cannot retire because Reynolds won't let him. We do not nominate Low now because he has so alienated his friends that we could get more votes for any respectable man as a straight candidate than for Low as a union candidate.

During Mr. Quigg's talk most of the women Miss Clara McCarten, daughter of Police Commissioner McCarten, performed a commendable act a few days ago, but not without serious injury to herself. She was riding her bicycle, when a small child ran in front of the wheel, and would have been child ran in front of the wheel, and would have been run over had not Miss McCarten made a sharp turn, thus passing the child, but throwing herself with much violence.

During Mr. Quigg's talk most of the women listened in silence, while others moved uneasily in their seats and stamped their feet in indignation, as if they would like to do something—if they only knew how.

Mrs. Dame was a woman of strong personality and unusual intellect. Born in Maine in 1813, she grew to womanhood in the bracing environment of Puritan thought. She was a pupil of Mary Lyon at Ipswich, and also at Mount Holyoke, and continued through life a student and profound thinker. Her death, at eighty-four years of age, will prive her children and the community of an intellectual influence which was reverently valued.
